### How to Use the Route Maps and Schedules

The route maps and schedules are color coordinated. The numbered stops on the map match the numbered locations listed on the schedule. To determine what time a bus will stop at a specific location, read across. To determine how long it will take you to get from one location to another, read down. Transfer points indicate designated stops at which you may transfer to other routes. When transferring, check the schedule of the route you are transferring to for exact times and return trip availability.
